

PRODUCT CARE & MAINTENANCE GUIDE

TechnoQuartz is a natural quartz surface that is highly stain and scratch resistant. The attractive, durable low-porosity surface is easy to maintain, highly resistant to household stains and never needs sealing or polishing, making TechnoQuartz an ideal product for both residential and commercial projects.

Follow these simple guidelines to keep your TechnoQuartz looking great for years to come. It's as easy as 1, 2, 3...

1. Wipe up any accidental spills immediately.
2. Wash the surface simply using a clean cotton cloth, warm water and mild soap (if desired).
3. Finally, thoroughly rinse the surface with plenty of clean warm water and dry using a soft, clean cloth or paper towel.

DO NOT EXPOSE:

Do not expose TechnoQuartz Product, in use or otherwise, to abrasive, strong alkaline, acid, free radicals, oxidizers, or cleaners of the like (whether high, neutral, or low pH). Various chemicals are corrosive and/or erosive in their ability to attack any surface, including TechnoQuartz Product. TechnoQuartz is not heat-proof, chemical-proof, or fracture-proof in any form. Be aware of exposure to these potentially damaging acts.

Prolonged exposure to certain cleaning products may cause damage and/or discoloration to the countertop surface. Avoid use of such cleaning products as, but not limited to, bleach, oven cleaners, Comet®, Soft Scrub®, S.O.S.® pads, products with pumice, oil soaps, batteries, paint removers, furniture strippers, tarnish or silver cleaners, furniture cleaners, dishwasher detergent, acetone or the like.

Do not use abrasive or harsh scrub pads. Do not apply any sealers, penetrants, or topical treatments to TechnoQuartz Product under any circumstances. Such products will wear off and could cause the gloss to appear dull or inconsistent.

Do not put hot cookware directly on the TechnoQuartz surface. Sudden and rapid temperature changes can cause discoloration or cracking, especially near the edges. It is always recommended to use trivets or hot pads to protect, especially when using cooking units such as electric frying pans, crockpots, toaster ovens.

Installation of TechnoQuartz Product requires walls and cabinets to be properly prepared for installation, which includes but is not limited to, structurally sound, straight, level and square walls and cabinets. Lack of proper preparation may cause poor installation and poor seam fit or inconsistent countertop overhang and placement. For more information, visit Hendrix's guidelines at www.hendrixindustries.com/fab&installationguide.

Warnings and Legal Notices:

WARNING: Although our products themselves do not pose a risk to end consumers once installed, it is during manufacturing and fabrication that the tradesmen performing these tasks are at risk of being exposed to Respirable Crystalline Silica (RCS1) containing dust. Exposure to silica dust from cutting, grinding, or polishing can cause acute lung injury, silicosis, or cancer. Wear proper personal respiratory protection. Always use the recommended wet-cutting methods.

- NO DRY CUTTING, BORING AND DRILLING
- NO DRY GRINDING
- NO DRY POLISHING
